INSTRUCTIONS - *Only one per group is needed*
- Choose either thinner bars (page 2) or wider bars (page 3);
- Make 3 strips of bars, each 11 inches long, by cutting along the narrow white space separating each row of bars.
- Make the 3 strips equal in width by cutting the excess white borders along the length of the 1st and 3rd rows.
- Tape the 3 rows of bars together lengthwise to make one strip about 33 inches long. NOTE: you will need to trim the white space and adjust the position when taping so the space between black bars across the seam is equal to that of the other bars.
- Looks like this when finished (without brackets):
